The presentation of a Panoramic View of the French Language as a whole. 4. Teaching one thing at a time, and proceeding by Inductive Steps. 5. #### BADOIS'S GRAMMAIRE

ANGLAISE d'après le Système d'Ollendorff, à l'Usage des Français. Par CHARLES BADOIS. 12mo. 232 pages. Price, \$1.50.

The want of a condensed Grammar for teaching Frenchmen the English language, long experienced by residents as well as travellers in this country, has been met by M. Badois with this clear and practical Treatise, on the Ollendorff plan. In the course of a few lessons, the learner is so familiarized with the most necessary English words and idioms that he can readily express himself, and can understand ordinary conversation. To the grammatical course is appended a series of Reading Lessons, accompanied with an interlinear translation, which renders the volume complete, and makes it all that the French student can require for the acquisition of our tongue.

**CABINET DES FÉES**; or, Recreative Readings, arranged for the express use of Students in French. By G. GERARD, Professor of the French Language and Literature. 1 vol., 12mo. Price, \$1.50.

"This is just the book for learners of French who have just commenced to read in that tongue."

**CHOUQUET'S CONVERSATIONS AND DIALOGUES.** By GUSTAVE CHOUQUET. 16mo. 204 pages. Price, 75 cts.

A phrase-book is essential to those who would acquire an easy style of conversation in French. Such an auxiliary they will find in this work of Chouquet's, which embraces dialogues on daily occupations and ordinary topics, involving those idiomatic expressions that most frequently occur. The author displays judgment in his choice of subjects, and tact in adapting himself to the comprehension of the young. With a knowledge of the phrases and idioms presented in this volume, the student can take part in ordinary conversation with fluency and elegance.

**CHOUQUET'S GUIDE TO FRENCH COMPOSITION.** By GUSTAVE CHOUQUET. 12mo. 297 pages. Price, \$1.25.

This volume is intended to serve as a reading and translation book, a text-book on Rhetoric, and a manual of French composition and conversation. The First Part Comprises a treatise on Rhetoric, written in French, but applicable to all languages, which will discipline the mind of the learner in the elaboration of thought, and train his judgment for sound literary criticism. The Second Part is devoted to Composition proper; contains analyses and models of narrations, descriptions, dissertations, letters, etc., and a list of subjects on which, after these models, the pupil is required to try his powers.

It will be seen that this work is intended only for those who have already acquired some knowledge of the language; for such, particularly in young ladies' schools, it is admitted to fill, in the most satis-

factory manner, a want that was long felt. It teaches at once French and Rhetoric—and that by a pleasant and easy process.

## COLLOT'S DRAMATIC

**FRENCH READER**; being a Selection of some of the best Dramatic Works in the French Language. By Professor A. G. COLLOT. 12mo. 521 pages. Price, \$1.50.

In the belief that dramatic literature affords peculiar facilities for familiarizing the student with French conversation in familiar, as well as more elevated, style, Prof. Collet has brought together in this volume fourteen of the *chefs-d'œuvre* of the French drama, comedy and tragedy, by such authors as Scribe, Piron, Molière, Voltaire, Racine, and Corneille. They are arranged in progressive order, and furnished with notes on such passages as require explanation. Affording entertaining pictures of French life, as well as specimens of the finest style, it is believed that this collection is just what is needed for advanced classes.

## COMMENT ON PARLE A

**PARIS**: French as Spoken in Paris. By Madame DE PEYRAC. 12mo. 252 pages. Price, \$1.50.

"Comment on parle à Paris," or how they speak French in Paris, is certainly a very desirable thing to know; with the aid of this new and unique manual by Madame de Peyrac, the knowledge may be gained without difficulty. Her volume is not intended for children, but for those who have partially acquired the language, and need only familiarity with an elegant style of conversation. To invest the subject with greater interest, the form of a domestic romance is adopted. A variety of characters are introduced, and lively tableaux of French life and manners are presented. Teachers, who are dissatisfied with the Readers they have heretofore employed, are recommended to procure and examine this admirable volume, which has been warmly commended by critics and educators.

**CORINNE, OR ITALY. By**

**Baroness DE STAËL.** New edition, revised and corrected. 1 vol., 12mo. 433 pages. \$1.50.

In the whole circle of polite literature we scarcely know of any production in modern times, that has been honored with such lavish encomiums as the celebrated work, by Mad. de Staël, entitled "Corinne, or Italy." The multitude of eloquent passages and enchanting pictures which adorn this extraordinary production, do not impair in the least the interest of the fiction, as the authoress has skillfully introduced the digression only where the progress of the action is suspended, when the reader is even afraid of its resuming its course, and when he enjoys a moment of repose, so much the more because he is sensible of an approaching term. . . . "Corinne" is a work adapted to all readers. From its brilliant pictures the artist may derive fresh enthusiasm, with new means of expressing it; the learned may acquire ingenious comparisons and new imagery; the tourist to the classic land of the Old World, the most important and judicious hints.

**COUTAN'S CHOIX DE**

**POESIES (Select Poetry for Young Persons).** By Madame A. COUTAN. 12mo. 829 pages. Price, \$1.50.

Madame Coutan's collection, made during many years devoted to the teaching of French, embraces some of the choicest and best poetry in the language. While it is peculiarly adapted to young ladies' schools, there is no class of students or general readers to whom it will not prove an acceptable and instructive companion.

**De Fivas's French Works.****I. NEW ELEMENTARY**

**FRENCH READER: An Introduction to the French Language.** Containing Fables, select Tales, remarkable Facts, amusing Anecdotes. With a Dictionary. By ALAIN DE FIVAS. 16mo. 147 pages. Price, 75 cents.

**II. THE CLASSIC FRENCH**

**READER: or, Beauties of the French Writers, Ancient and Modern.** With a Vocabulary of all the Words and Idioms contained in the Work. By J. L. JEWETT. 12mo. 388 pages. Price, \$1.50.

The Elementary Reader, as its name imports, is for beginners. It consists of short and easy pieces, written in familiar style, and of the most attractive character.

The Classic Reader may, with advantage, follow the Elementary, or may be used independently of it with somewhat older classes. For this work, the choicest productions of the extensive field of classic French Literature have been gathered. The great names of Fénelon, Bossuet, Montesquieu, Chateaubriand, Thierry, Béranger, etc., afford sufficient guaranty of the purity, vivacity, and elegance of the contents. Each piece presents a subject complete in itself. By selections from the writings of different literary epochs, the reader is enabled to form an enlightened judgment of each, and the work is thus rendered a faithful mirror of the best French literature, ancient as well as modern. The short biographical sketches of the authors, prefixed to the several extracts, will be read with interest.

**III. NEW GRAMMAR OF**

**FRENCH GRAMMARS.** Comprising the substance of all the most approved French Grammars extant, but more especially of the Standard Work, "Grammaire des Grammaires," sanctioned by the French Academy and the University of Paris. With numerous Exercises and Examples illustrative of every Rule. By Dr. V. DE FIVAS, M. A., F. E. I. S. 1 vol., 12mo. \$1.25.

At once the simplest and most complete grammar of the French language. To the pupil, the effect is almost as if he looked into a map, so well defined is the course of study as explained by M. de Fivas.

"Its precision and conciseness are admirable. We cordially recommend it to teachers and students. Its excellence cannot fail to secure it an established reputation."  
—Standard.

**THE FRENCH MANUAL : A**

New, Simple, Concise, and Easy Method of Acquiring a Conversational Knowledge of the French Language, including a Dictionary of over Ten Thousand Words. By M. ALFRED HAVET. Entirely revised and corrected from the last English edition, with a new system of Pronunciation. 1 vol., 12mo. 332 pages. Half bound, \$1.35.

"A great many learners," says *Le Courrier de l'Europe*, "might, after having waded through the tedious courses of French hitherto followed, be able to express themselves in a sort of half academic language, but it would be altogether impossible for them to converse on the ordinary topics of every-day life, or give an order to a servant. It is this familiar language that M. Havet's book is destined to put them in possession of, and we believe nothing has been neglected to secure that happy result." It is, in the opinion of some of our foremost teachers, emphatically the best system for learning French.

**Ollendorff's French Grammars.****FIRST LESSONS IN THE**

FRENCH LANGUAGE; being an Introduction to Ollendorff's Larger Grammar. By G. W. GREENE. 16mo. 138 pages. Price, 75 cents.

**OLLENDORFF'S NEW METH-**

ciation, his Grammatical Synopses, a New Index, and short Models of Commercial Correspondence. By V. VALUE. 12mo. 588 pages. Price, \$1.25.

**KEY TO EXERCISES.** Separate volume. Price, \$1.

Ollendorff's French Grammars have been before the public so long, and have had their merits so generally acknowledged, that it is unnecessary to enter into any detailed description of their peculiarities or lengthy argument in their favor. Suffice it to say, that they are founded in nature, and follow the same course that a child pursues in first acquiring his native tongue. They teach inductively, understandingly, interestingly. They do not repel the student in the outset by obliging him to memorize dry abstract language which conveys little or no idea to his mind, but impart their lessons agreeably as well as efficiently by exercises, which teach the principles successively involved more clearly than any abstract language can. They give a conversational, and therefore a practically useful, knowledge of the language; the student is made constantly to apply what he learns. To these peculiarities is due the wide-spread and lasting popularity of the Ollendorff series.

Prof. Greene's Introduction, the first of the works named above, will be found useful for young beginners. In it are presented the fundamental principles of the language, carefully culled out, and illustrated with easy exercises. It paves the way for the larger works, preparing the pupil's mind for their more comprehensive course, and awakening in it a desire for further knowledge.

Value's and Jewett's works are essentially the same, though differing somewhat in their arrangement and the additions that have been made to the original. Some institutions prefer one, and others the other. Either, it is believed, will impart a thorough acquaintance with French, both grammatical and conversational, by an interesting process, and with but little outlay of time and labor.

**PRONOUNCING FRENCH**

**DICTIONARY.** By GABRIEL SURENNE, F. A. S. E. 16mo. 556 pages. Price, \$1.25. Pocket edition.

In the preparation of this new work, due regard has been paid to the introduction of such new words and definitions as the progressive changes in the language have rendered necessary; and for this purpose the best and most recent authorities have been carefully consulted. It is therefore confidently anticipated that the volume will prove not only a useful auxiliary to the student, but also a convenient Pocket Companion to the traveller, wherever the French language is spoken. A vocabulary of proper names accompanies the work.

**ROWAN'S MODERN FRENCH**

**READER.** With a Vocabulary of the New and Difficult Words and Idiomatic Phrases adopted in Modern French Literature. By F. ROWAN. Edited by J. L. Jewett, Editor of Ollendorf's French Method. 12mo. 341 pages. Price, \$1.50.

One object of this volume is to offer specimens of the French language as it is spoken at the present day, and presented in the works of the modern authors of France, without the risk of sully the mind of the young reader by indelicate expressions or allusions. Another is to facilitate the task of the teacher by rendering the work attractive to the pupil. Such selections have therefore been made as will, it is hoped, be interesting and entertaining to the young reader, while at the same time they will prove worthy specimens of the peculiar style of their respective authors.

The American edition is rendered still more valuable by the addition of extracts from the writings of Sismondi and Mignet, modern historians of distinguished merit. The vocabulary of new and difficult words and idiomatic phrases is conveniently arranged for reference, and considerably enlarged; while the whole has undergone thorough revision, with a view to accuracy in every particular. The orthography has been made to conform to that of the Dictionary of the Academy and the usage of modern writers.

The selections are made from modern authors exclusively, and bear witness to the nice literary discrimination of the compiler. As a collection of elegant extracts, this volume is second to none; it has become a general favorite both with teachers and students.

**ADLER'S GERMAN-AND-**

**English, and English-and-German Pronouncing Dictionary.** By G. J. ADLER, A. M., Professor of the German Language and Literature in the University of New York. One elegant large 8vo vol. 1,400 pages. Price, \$6.

The aim of the distinguished author of this work has been to embody all the valuable results of the most recent investigations in a German Lexicon, which might become not only a reliable guide for the practical acquisition of the language, but one which would not forsake the student in the higher walks of his pursuits, to which its treasures would invite him.

In the preparation of the German and English Part, the basis adopted has been the work of Flügel, compiled in reality by Helmann, Felling, and Oxenford. This was the most complete and judiciously-prepared manual of the kind in England.

The present work contains the accentuation of every German word, several hundred synonymes, together with a classification and alphabetical list of the irregular verbs, and a dictionary of German abbreviations.

The foreign words, likewise, which have not been completely Germanized, and which often differ in pronunciation and inflection from such as are purely native, have been designated by particular marks.

The vocabulary of foreign words, which now act so important a part, not only in scientific works, but in the best classics, reviews, journals, newspapers, and even in conversation, has been copiously supplied from the most complete and correct sources. It is believed that in the terminology of chemistry, mineralogy, the practical arts, commerce, navigation, rhetoric, grammar, mythology, philosophy, etc., scarcely a word will be found to be wanting.

The Second (or German-English) Part of this volume has been chiefly reprinted from the work of Flügel. The attention which has been paid in Germany to the preparation of English dictionaries for the German student has been such as to render these works very complete. The student, therefore, will scarcely find any thing deficient in this Second Part.

**AN ABRIDGMENT OF THE**

**ABOVE.** 12mo. 844 pages. Price, \$2.50.

With a view of offering to the student of German such a portion of his larger work as would embody the most general and important lexicographical elements of the language in the smallest possible compass, the author has gone over the entire ground of the larger work—revising, condensing, or adding, as the case might require. All provincialisms, synonymes, and strictly scientific terms, have been excluded from these pages, and every thing that might prove unnecessary or embarrassing to beginners, or to travellers, and others for whom a smaller volume is better adapted.

*From C. C. FELTON, Prof. of Greek,  
Harvard Univ.*

"The careful manner in which Prof. Adler has investigated the language as employed by the great body of recent German writers, and the accuracy with which the best usage is explained in his definitions, make the work peculiarly valuable for English and American students."

**ADLER'S HAND-BOOK OF**

**GERMAN LITERATURE.** Containing Schiller's *Maid of Orleans*, Goethe's *Iphigenia in Tauris*, Tieck's *Puss in Boots*, *The Xenia*, by Goethe and Schiller. With Critical Introductions and Explanatory Notes; to which is added an Appendix of Specimens of German Prose, from the middle of the Sixteenth to the middle of the Nineteenth Century. By G. J. ADLER. 12mo. 550 pages. Price, \$1.50.

For classes that have made some proficiency in the German language, and desire an acquaintance with specimens of its dramatic literature, no more charming selection than this can be found. Sufficient aid is given, in the form of introductions and notes, to enable the student to understand thoroughly what he reads. The progress of the language is graphically illustrated by specimens of the literature at different eras, collated in an Appendix.

**ADLER'S PROGRESSIVE**

**GERMAN READER.** By G. J. ADLER, Professor of the German Language and Literature in the University of the City of New York. 12mo. 308 pages. Price, \$1.50.

The plan of this German Reader is as follows:

1. The pieces are both prose and poetry, selected from the best authors, and present sufficient variety to keep alive the interest of the scholar.

2. It is progressive in its nature, the pieces being at first very short and easy, and increasing in difficulty and length as the learner advances.

3. At the bottom of the page constant references to the Grammar are made, the difficult passages are explained and rendered. To encourage the first attempt of the learner as much as possible, the twenty-one pieces of the first section are analyzed, and all the necessary words given at the bottom of the page. The notes, which at first are very abundant, diminish as the learner advances.

4. It contains *five* sections. The *first* contains easy pieces, chiefly in prose, with all the words necessary for translating them; the *second*, short pieces in prose and poetry alternately, with copious notes and renderings; the *third*, short popular tales of Grimm and others; the *fourth*, select ballads and other poems from Bürger, Goethe, Schiller, Uhland, Schwab, Chamisso, etc.; the *fifth*, prose extracts from the first classics.

5. At the end is added a vocabulary of all the words occurring in the book.

The pieces have been selected and the notes prepared with great taste and judgment, so much so as to render the book a general favorite with German teachers.

It is the work of a practical teacher, who has learned by experience what the difficulties of the pupil are and how to remove them.

**BRYAN'S GRAMMAR FOR**

Germans to learn English. Edited by Professor **SCHMIEDER.** 12mo. 189 pages. Price, \$1.25.

The publishers have got out these volumes in view of the great number of Germans residing in and constantly emigrating to the United States, with whom the speedy acquisition of English is a highly desirable object. To aid them in this, the services of competent and experienced teachers have been procured, and the admirable Grammars named above are the results of their labors.

The Ollendorff Grammar embraces a full and complete synopsis of English Grammar, applied at every step to practical exercises. It is constructed according to the "New Method" which has so generally approved itself to public favor. A month's study of this volume will supply the learner with such current

idioms that he can comprehend ordinary conversation, and in turn make himself understood.

Bryan's Course is briefer, and better adapted for primary classes and those whose time of study is limited. It presents the cardinal principles of the language, well arranged and clearly illustrated. The anomalies of English syntax are handled in a masterly manner, and the general treatment of the subject such as to remove from it all difficulties by the way.
